Project Overview

Brief overview of the project

We understand you need for a modern, high-performing website that reflects your brand, engages users, and supports business growth. This proposal outlines our strategy to design and build a site that aligns with your goals—communicating value, building trust, and delivering results through thoughtful design and smart functionality.

Goals & Objectives

01 Fully Responsive Design

Build a mobile-friendly website that adapts to all devices, ensuring smooth performance on desktop, tablet, and smartphones.

02 Key Features Integration

Add contact forms, WhatsApp chat, newsletter sign-ups, Razorpay, and AI tools like chatbots for a powerful user experience.

03 Google Analytics Integration

Track website visitors, behavior, and performance using Google Analytics to make smart, data-driven business decisions.

05 Google Search Console Setup

Improve search visibility and monitor performance by integrating your website with Google Search Console.

06 On-Page SEO Optimization

Enhance your search rankings with keyword-rich content, meta tags, image optimization, and other on-page SEO strategies.

05 1 Year Maintenance Support

Receive technical updates, bug fixes, and general support with one year of free maintenance service.

06 1 Year Free Hosting

Get fast, secure, and reliable web hosting absolutely free for one year—no extra cost.

Project Phases

Phase - 1
Planning & Design

We'll define the project goals, create wireframes, and design a user-friendly interface that aligns with your brand.

Phase - 2
Development

Our team will code and build the website, ensuring responsiveness, performance, and integration of all required features.

Phase - 3
Testing & Revisions

We'll test the site on all major devices and browsers, fix any issues, and make final tweaks based on your feedback.
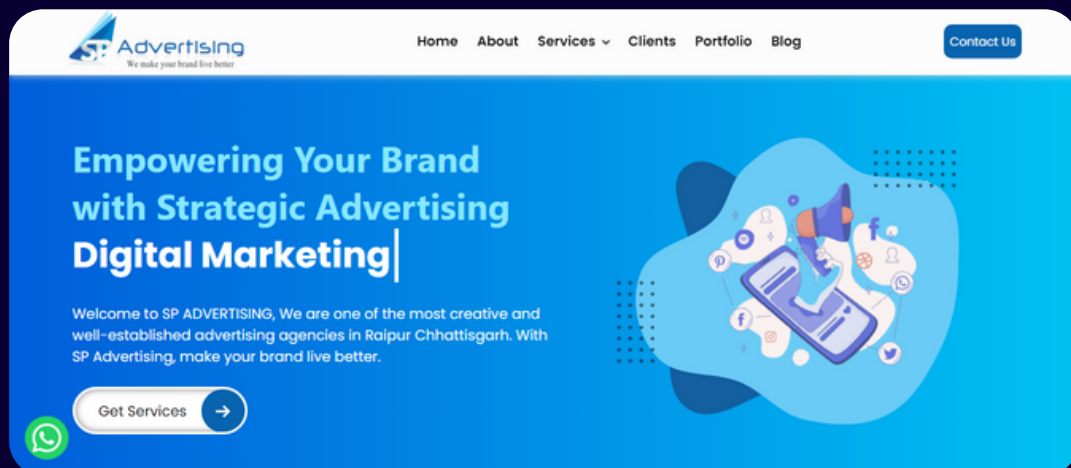

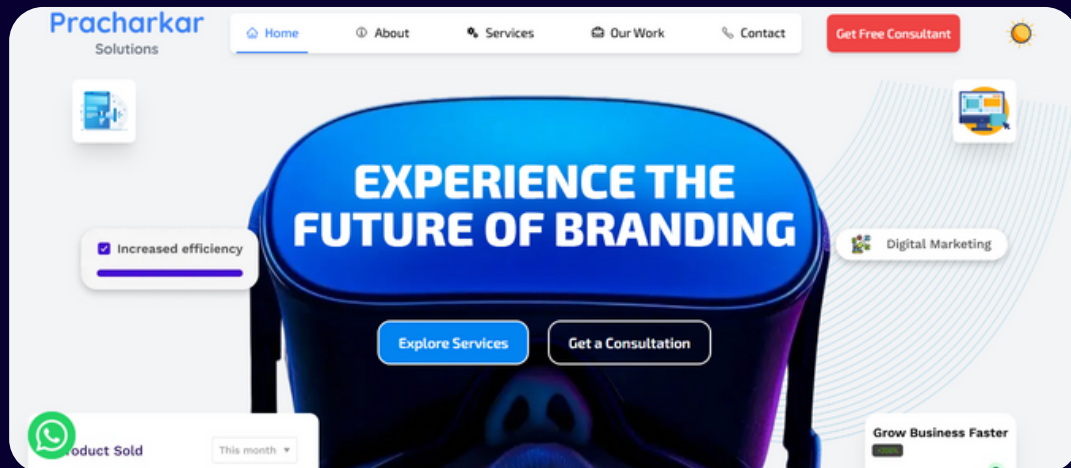

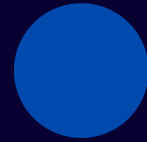

Phase - 4
Launch

After approval, we'll deploy the website and ensure everything is running smoothly for a successful launch.
